

## E! PRESENTER

---

Are you organising a conference including speakers and presentations divided throughout several rooms? If so, we can offer you a unique solution with our E! Presenter!

Eventresult, ACS's IT label, that represents smart IT solutions at conferences and meetings, presents to you, the E! Presenter; the solution to easily manage presentations, and present without problems. Contrary to what people believe, presentation management is not only for large conferences. E! Presenter can be used at almost every conference that consist of 50 presentations or more.

With the help of E! Presenter, a lot of stress can be removed from the congress organiser, starting from the upload process before the congress, to the problem-free presenting during the congress itself, and the publication of presentations after the congress. For the speakers of a conference this means that, with the use of E! Presenter, they can carefully prepare and give their presentation without any stress.

With the E! Presenter; you save valuable time, minimise the chance of errors, and provide your conference with a more professional look.

The core of the E! Presenter is the database that we build for your conference. Within the database, all the presentations can be stored and saved prior to the conference. All content is stored on a local server as soon as it is received, therefore the system is not dependent on internet, making it very stable, reliable and flexible.

## CONCERNING THE SPEAKER

- » An user-friendly system that everyone is able to operate
- » The possibility to upload presentations via internet from any location, or at the Speaker Service Centre (SSC)
- » Last minute adjustments to presentations are possible, even during the conference itself
- » Speakers can check their name and job title, and make any necessary adjustments
- » System is compatible with PowerPoint, Prezi and Keynote presentations
- » In the SSC, the speakers can get familiar with the system on location
- » Onsite support from our PowerPoint specialists in the SSC, among other things; checking the presentation for compatibility with the AV system and making sure that videos and effects function correctly
- » The speakers themselves remain in control during the presentation, with the support of a fast-responding touch screen, control unit
- » Comfort monitor includes the speaker's notes, a timer and an preview of the following slide
- » Touch screen with laser pointer function
- » The speaker is free to move around the stage

## CONCERNING THE ORGANISATION

- » The layout of the upload page can be customised and branded with logos, banners and photos
- » There is no maximum amount of presentations and rooms can be managed simultaneously
- » Remote room/session monitoring
- » Personal data management Privacy Policy in accordance with GDPR
- » Management of presentations from a central database
- » Last minute adjustments in the program can be managed quickly and will automatically be transferred to other systems, such as the room information display
- » Automatic registration of every presentation
- » Ease of integration with other applications
- » A link to the requirements of the Pharmacode (i.e. disclosure slides)
- » Authorisation/copyright features are regulated during the upload process (permission for publication)
- » A dashboard with useful data and statistics; before, during and after the conference
- » Registration and storage of presentations during the conference and the possibility to edit and make it available online after the congress

## EXTRA OPTIONS

If more features are required, the following **extensions** can easily be added:

- » Webcast; record sessions for direct streaming via internet or as recordings for later.
- » Overflow: at the click of a button, video, audio and the presentation are distributed to a screen elsewhere in the building
- » Room information display and signage; a screen placed at the entrance of the room, that includes programme and room information
- » Digital lectern and digital faculty table; digital furniture with built-in LED screens on which dynamic information can be presented, which is legible to the attendees
- » Integrated voting software to increase the participation of the delegates

We would be more than happy to advise you on **sponsorship opportunities**, for example; branding the upload page, the break slides and the chair tables/lecterns.

**Read more about these specific services on our website or ask your ACS contact for an extensive product leaflet.**
